

Sensory Water Play

NOTE: An adult would need to supervise children playing with water

1# Find what you have at home.

You will need: An adult for supervising the use of water and water play, a large tub, a boat, animals, a person (for Noah), lots of animals, a bucket or jug of water, and as an optional extra a bit of dirt or sand.

2# Simply, put your dirt or sand in your large container/tub/baby bath, put the ark on the 'ground'. Then let your imagination run wild! How did the animals get in the ark? Were they noisy? Did the animals go in 2 by 2? What is your favourite animal?

3# Once all the animals are on the boat, have fun pouring the water on top of the dirt, until the boat floats. Then have fun, splashing... do you have a dolphin or turtles you could put in your water?
